

Drifter

Product guide

NOTE: If you choose a wedge component you will need to add an additional 130mm to the rear length measurement, eg, for a chair with one arm and one wedge, the front L-to-R measurement is 910mm, while L-to-R at rear measures 1040mm.

1490 when partially reclined

1600 when fully reclined

Form and function are strongly aligned and quietly accentuated by the curved solid timber trim in the clean, elegant lines of Drifter.

This practical design features interlocking seats and arms that easily facilitate custom designed floor plans, allowing you to maximise space and optimise seating capacity in lounge rooms, home theatres and media rooms.

A one-touch control operates the quiet, electrically powered mechanism, allowing the seat's occupant to pause and stop in any desired position between upright and fully reclined.

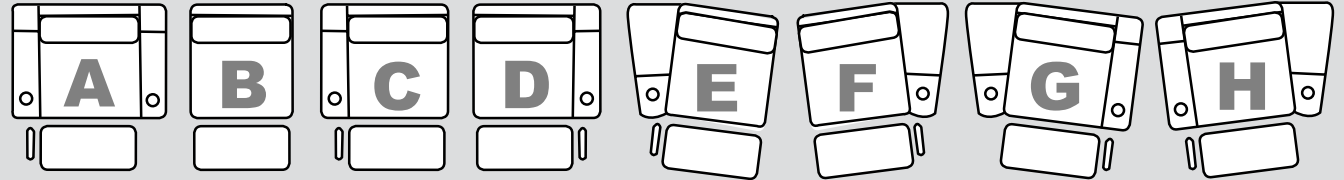

The optional, adjustable head rest ensures maximum long term comfort for taller people. An adjustable swing table is also available.

The Drifter is also a breeze to clean, thanks to the absence of old fashioned dust trapping pillow-style cushions. Most components, including the chaise foot pad, detach easily for maintenance.

Available in leather or the fabric of your choice. Guaranteed for ten years.

Components

Optional drink holders, adjustable 280mm swivel tables and adjustable headrests by request. Triangle wedge arms also available separately.
